1. Claims 6 and 8 were previously restricted and withdrawn from consideration. As the generic claim 1, from which claim 6 and 8 depend, has been determined as allowable, claims 6 and 8 are rejoined with the elected group and determined to be allowable for the reasons as claim 1 described below. See MPEP 821.04(a).

2. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach or suggest a mold as defined in the claims of the instant application. The closest prior art is demonstrated by Cowelchuk (U.S. Pat. No. 6,875,390); Heuer (U.S. Pat. No. 2,902,721); or Japanese Pub. No. 2001-190311 (hereinafter "JP '311").

Cowelchuck discloses a method of manufacturing a vehicle trim component using a mold (see Fig. 4). The mold includes a pedestal structure (30) protruding from the mold surface, with a magnet (46) located on the top surface of the pedestal. The reference, however, fails to teach or suggest a plurality of magnets, or a veneer permanently adhered to the pedestal.

Heuer discloses a process of molding a refractory brick using a mold structure. The mold includes magnets (25), with veneer-like plates (28) attached to the top of the magnets. The

reference, however, fails to teach or suggest the plates to be permanently attached to the magnets, or the magnets to be on the top surface of a pedestal protruding from the mold surface.

JP '311 discloses a fastener molding device, which includes a magnet (4) and plate adjacent to the top surface of the magnet (see Fig. 1). The reference, however, fails to teach or suggest a plurality of magnets, the plate to be permanently attached to the magnets, or the magnets to be on the top surface of a pedestal protruding from the mold surface.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
